

Lancaster Farming

Vol. III. No. 19.

Quarryville (Lancaster County) Pa., Friday, March 21, 1958

\$2 Per Year

CONGRATULATING EACH other are Robert Fahnestock and Dean Hoffer with Andrew Hackman in the center. Fahnestock was presented a trophy as the best land judge in the York-Lancaster County FFA

region and Hoffer was given a special citation for his conservation speech. Hackman was given a plaque as the Outstanding Conservation Farmer in Lancaster County. (LF Photo)

New Foods Lunch Feature of Food Council Meeting

HARRISBURG — A "no holds barred" Pennsylvania Food Marketing Advisory Council meeting near here March 26-27 is expected to give the food industry some food for thought.

One of the features of the event has been billed as a "new foods luncheon" at which experimental foods will be tasted and tested.

"We know of the scientific and technological advancements in the food industry as evidenced by strong midwestern competition for markets," John L. Rainey, director of the Bureau of Markets, State Department of Agriculture, said. "It is our hope the Pennsylvania food industry will recognize this competition," he added.

Foods will be tasted by impartial observers who will be asked to mark their product preference. Products made from vegetable fats and other scientifically developed substitutes will be judged by tasters and compared with established foods.

Rainey admitted the results of the tasting could prove challenging but said the food industry must know whether consumer preference is for products manufactured from concentrates which in recent years has been the trend in the midwest.

"We want to keep our eyes on the future and establish our promotional patterns for food accordingly," Rainey said.

The luncheon discussion will be centered around the outlook for food technology research.

The meetings will be held at the Holiday West Motor Hotel near the Gettysburg Interchange of the Pennsylvania Turnpike.

Wheel Track Planting of Corn May Work Here in Loose Drained Soils

Have you tried planting corn in the tracks made by tractor wheels? Reports from farmers in Pennsylvania and experiment stations in other states indicate that this method has limited possibilities, Chester County Agent Robert A. Powers, Jr. says.

The agronomists and agricultural engineers at Penn State suggest that farmers in some areas of Pennsylvania may find this method may be satisfactory in loose well drained soils, but should not be encouraged in tight soils where water will puddle and stand for long periods of time.

The current method of seedbed

preparation for planting corn requires several operations which are expensive, Powers explains. It includes plowing, disking and dragging to smooth the surface and then a separate operation for planting. This is the tried and true method but it is expensive and in many areas overworking the soil destroys soil structure and may lead to increased erosion problems.

One or more manufacturers have adapted mounted corn planters to this method of planting and in some instances farmers have modified their own equipment.

3-point Plan to Be Given Chamber

Have any Ideas?

If you have any ideas on how the Lancaster Chamber of Commerce can help improve their relationship with the farm population in Lancaster County and help improve the business of farming in this area, let's hear from you.

On the special group are Lester Brubaker, 350 Strasburg Pike; John E. McGrann, Farmer Supply Co., Lancaster; Walter Dunlap Jr., Union Stock Yards, Lancaster; and Robert Best, Editor, Lancaster Farming, Quarryville. Any of these men will be glad to hear your ideas.

Or you can put them in writing and send them to Lancaster Farming, Box 126, Quarryville, Pa.

banquet proved to be so popular that crowds overflowed the facilities of the hotel and hundreds of people were turned away. However the spectacular suc-

Soil District President Predicts 1958 to Be "Biggest Year Ever"

Pointing out that such events as the National Plowing Matches and Conservation Exposition, Soil Stewardship Week, and that the assistance of additional groups such as the League of Women Voters is being obtained, the president of the Lancaster County Soil Conservation District, Amos H. Funk, R1 Millersville, predicted that this will be the "biggest year we've ever had."

Funk's remarks were made Monday night at the annual meeting of the district held at Hostetter's Banquet Hall in Mt. Joy.

He also called on the conservation minded farmers attending, some 270 in all, to look at their rotations to see that they are in step with the times. He said that present practices of fertilization and new varieties may allow the rotation to be stretched out, thus getting a greater return for the labor, seed and fertilizer saved.

Funk also voiced three proposals for the district to undertake in 1958. A dollar and cents study of the value of conservation practices on the farm is needed, he said. Many farmers ask, "How much will it help me?" first when they are talking about putting in strips or terraces. The answer is that question is needed, he said.

He also called for the construction of 50 new farm ponds. Ten of these ponds should be of the reservoir or run-off filled type. The reason, he said, is that these offer more capacity than the usual stream fed or spring fed type. With such a greater volume, more water would be available for supplemental irrigation or stock water.

And lastly, he said that he would like to see two farms in the northern part of the county dressed out in terraces and diversions. The steeply rolling land there requires such a practice.

Funk was followed by Leeland H. Bull, state deputy-secretary of agriculture. As national chairman of the plowing matches, he outlined some of the highlights

of the events to be held in Hershey next August.

He said that crowds attending the event will overflow Hershey to as far away as Philadelphia. Already, he said Hershey is sold out as far as rooms are concerned.

One large manufacturer of farm equipment has made arrangements to bring in large aircraft to give attending farmers an aerial view of the matches and the surrounding country-side.

Henry Hackman, R2 Manheim, president of the state soil conservation association, Bull pointed out, has one of the best jobs the exposition offers. Hackman is in charge of finding the "Queen of the Furrow." This will be a Pennsylvania farm girl who will reign as national queen. Five hundred dollars worth of new clothes and a trip to New York City go with the title.

Bull noted that the state will be the first major state east of the Mississippi to be brucellosis free. Formal announcement of certification is expected to be made at a meeting of the state brucellosis committee in Harrisburg tonight.

The current flare-up of rabies was noted by Bull. He urged farmers in areas with heavy fox populations to vaccinate against rabies and to exercise caution in handling any animals suspected of rabies. He said that several people in the state are now undergoing the Pasture treatment because of exposure.

Wayne B. Rentschler, secretary-treasurer of the association, reported that 120 new co-operators had been signed in 29 townships during the last year. This placed 8,890 acres in the district.

The district now has 1,604 co-operating members.

He also noted that 1,497 persons attended 22 educational meetings and that 165 farmers came to a series of small watershed meetings held last fall.

He gave reports from some of the cooperating agencies.

The Outstanding Conservation

(Continued on page sixteen)

Broilers Remain High; Average 23.34 At Lancaster Exchange Thursday

LANCASTER — The broiler average remained high with the greatest average since 1955 being paid at the Lancaster Poultry Exchange's March 13 auction.

A total of 64,000 broilers ranged from 22½ to 26½ cents with the average being 23.34 cents. Catches 5,800 of them, shared in the general price rise with the prices ranging from 35 to 37½ cents a pound.

A lot of 800 light fowl sold for 16½ cents three lots of heavy fowl brought from 25 to 26½ cents, and two lots of 12 week old birds brought 27½ and 27½ cents.

A year ago the average for 9,280 broilers was only 19.88 cents. These birds sold in two lots with the Tuesday average being 20.17 and the Thursday average 19.60 cents.

Here is the March 13 sale by lot number seller with grower in parenthesis, number and breed age in weeks and days, buyer and price per pound.

1. Howard Kleider Jr., 400 White Rock hips 116 J Rob 14 Charles 27½ cents 2. Norman Rutt, 800 DeKalb fowl, 23 months Harry H Weaver Jr., 18½ cents 3. REAL SUPPORT

You can depend on this support. Big Eggs are worth big premiums most of the year. Mediums and Small are usually a "break-even" or loss.

It costs as much in floor space, labor, feed and marketing for low grade eggs as for these Big Premium eggs.

This makes sense. Switch to a big egg Leghorn and get more for your labor. That means a genuine Mount Hope bird—the original Big Egg producer, based on 35 years' breeding for this big money factor. Get up to 90% "above Mediums."

Buy from a nearby Franchised Hatchery and be sure.

This is your largest nearby Franchised Hatchery

Short Receipts Boost Cattle At Baltimore

BALTIMORE, March 18 — CATTLE AND CALVES Receipts were below normal for a Monday, but they well exceeded the early estimate around 200 head. Fed steers made up approximately 60 per cent of the supply and fed heifers 10 per cent. These were mostly good and choice grades. The balance was mostly cows. Fed steers were very active and sold unevenly 25 to 75 cents higher, mostly 50 to 75 cents up. Fed heifers were active and sold 50 cents higher. Cows were moderately active with prices advancing 50 cents. Bulls sold steadily to strong with instances a \$1.00 higher. A short load of 1067 lb mostly high choice fed steers arriving an end of low prime brought \$31.25 the highest price for steers on the Baltimore market since January 1955. A half load largely average to high choice 1166 lb steers sold at \$30.50 and the bulk of 950-1170 lb good to average choice \$27.00 to \$28.75 with 2 small lots \$29.00 to \$30.00. Choice lots of standard and good \$25.00 to \$27.00. Bulk of good and choice 700-900 lb fed steer, \$24.00 to \$26.50, 40 head 900 lbs included at \$25.75, individual 710 lb low prime \$27.00. Utility and commercial cows \$17.25 to 20.00, few high commercial to standard \$20.00 to 22.00. Canners and cutters \$14.50 to 17.50. Utility and commercial bulls mostly \$19.00 to 22.00, scattered head \$22.25 to 25.50. Individual \$23.00. Prices on cows and bulls highest since 1952 and 1953. Few individual high choice 215-225 lb weaners \$33.00, 160-230 lb good and choice vealers \$27.00 to 32.00, standard \$23.00 to 27.00. Small lots good and choice 533 lb stock steers brought \$30.00. A 33 head lot around 950 lb partly fattened steers, grading good from a slaughter basis, sold as feeders for \$27.50. A small lot medium and good 753 lb feeder steers brought \$24.90 and a small lot near 450 lb medium to good stock steer calves \$26.50.

HOGS Butchers were active and sold mostly 75 cents higher, some mostly 25 cents higher with instances 50 cents up. The supply was made up mostly of mixed lots 100-240 lb butchers grading U S No 1, 2 and 3. These sold at \$22.50 to mostly \$22.75 with 75 head No 1 and 2, 210-221 lbs at \$23.00. Mixed No 1 to 3, 300-400 lb sold mostly \$18.50 to 19.25 with a few under 300 lbs at \$19.50. The present prices highest for butchers since August 1957 and highest on hogs since October 1957.

Sat., April 12 at Fritz Town, near Reading, 50 head of cattle, 100 head of hogs, 20 tractors, horse drawn machinery. Sale at noon

MATHIESON POINT PROFIT PROGRAM

Here's an exclusive agricultural profit program that gives you cost-saving production and bonus profits.

1. AMMO-PHOS® FERTILIZERS

High-analysis, pelletized, and water soluble AMMO-PHOS fertilizers assure maximum yields. The concentrated form provides more plant food with reduced handling and storage costs. Water solubility means both an immediate and long-lasting supply of plant foods. An analysis is available for every crop and soil condition.

2. ANHYDROUS AMMONIA

Mathieson Anhydrous Ammonia—82% nitrogen—is highly effective when applied as a side dressing, at planting time or at plow-down. Always supplying nitrogen in its most useable, non-leaching form, Mathieson Anhydrous Ammonia is especially effective when applied during crop residue plow-down since decay of residues is more rapid and complete.

3. PESTICIDES

Mathieson offers a complete line of high quality Insecticides, Fungicides and Herbicides completely tested and approved carefully formulated for maximum effectiveness.

4. IRRIGATION SYSTEMS

Mathieson custom engineered irrigation systems are designed to meet individual requirements. Important features such as square shoulder raskets, positive lock couplers, extended foot and steel bushings insure dependable and economical performance.

For Additional Information or Service Contact Your Own Mathieson Dealer or Sales Representative.

Oats Now Are Expensive Part Of Hog Ration

Recent research at the University of Illinois raises a question as to whether farmers can afford to feed oats to fattening hogs when oat prices are as high as corn prices.

In the tests, hogs weighing about 100 pounds were fed to 200 pounds of weight on rations containing one-third oats, two-thirds oats and all oats and corn and no oats.

Average daily gains were 1.75 pounds on the all-corn rations with no oats at a cost of \$9.10 per hundred pounds of gain.

When the diet contained one-third oats, gains and costs were 1.56 pounds and \$10.5, respectively; two-thirds oats, 1.45 pounds and \$10.80, and all oats, 1.31 pounds and \$11.65.

4.7 Million Eggs

Laid in February

A total of 4,753 million eggs were laid by farm flocks during February, a decrease of five per cent from February 1957, according to latest Crop Reporting Board figures.

The rate of lay per layer was also down a little—153 eggs in February 1958 compared to 154 in February 1957 and the 1947-56 average of 143 eggs.

Reduce mortality losses
clean up

Overproduction of Feed Grains Dropped Price Despite Increased Cattle Numbers

RECORD production last fall, poor harvesting weather and mounting stocks have all combined to bring feed grain prices well below last year's level.

The nation's feed bins are bulging from the 142-million-ton harvest of 1957 and a record 49-million-ton carryover from preceding years.

The 1957 feed grain crop was nine per cent larger than that of 1956 and nearly a fifth above the 1950-51 average. Also, much of the corn and sorghum grain is high in moisture content and must be fed or artificially dried before warm weather this spring to avoid spoilage.

These circumstances explain much of the 20 per cent decline from last year in the average prices received by farmers for feed grains. The average is now about 40 per cent lower than six years ago when the current feed grain price decline began. It is the lowest figure since World War II.

Still other reasons for this year's price reductions are that fewer corn producers are eligible for the full price support than in other recent years, and supports for feed grains are lower.

Only about 14 per cent of the 1957 corn crop in the commercial area was produced in compliance with acreage allotments, which was required for eligibility for full support price of \$1.40 a bushel.

The other 86 per cent was produced by non-compliers and is eligible only for the lower support rate of \$1.10 a bushel. The

average price received by farmers for corn dropped to 93 cents a bushel in mid-January.

Price supports for feed grains have been lowered in recent years as corn supplies have increased. Corn price supports were reduced from a national average of \$1.62 a bushel for the 1954 crop to \$1.40 a bushel for the 1957 crop. Support prices for other feed grains have also been lowered.

Low feed prices this year have resulted in generally favorable livestock-feed prices. In January, the average price received by farmers for hogs a hundred pounds was equivalent in value to nearly 20 bushels of corn, much more than the 1937-56 average of 13.1 bushels.

Prices of beef steers, dairy products, and eggs also were high in January in relation to feed prices. Prices of broilers, farm chickens, and turkeys, however, have remained below the 10-year average relative to feed costs.

Prices received by farmers for livestock and livestock products fell about 30 per cent from 1950-51 to 1954-56. During the past two years, livestock prices have gained back about a third of this reduction.

Since 1951 there has been little net change in the number of grain-consuming livestock on farms. The number increased about 10 per cent from 1947 to the post-war high of 1950, declined rather sharply from 1950 to 1953, then increased, but has remained a little below the 1950 peak.

BY JACK REICHARD

75 Years Ago

An amusing incident in the life of Humboldt noted German astronomer and traveler back in the 1800's occurred during his visit to Iszym in Siberia.

It seems that Humboldt, who had come to Iszym to make some astronomical observations, went to the house of M. Skotin, the principal governmental official in the place with a letter of introduction from the Governor General of Siberia. About a week later the Governor General received a letter from Skotin reporting the arrival of Humboldt and his actions during the first few days of his stay at Iszym. Skotin wrote:

Some days ago there came here a German named Humboldt, a dumpy little man looking anything but respectable. As however he brought with him a letter from Your Excellency, in which I was directed to treat him with politeness and consideration, I received him with all due respect at the same time. I must observe that this individual seems to me very suspicious, even dangerous. From the first he did not please me. He gossiped too much and did not like the late I offered him though I have a cook. Felsa who makes excellent progress would be most happy to of to some to Your Excellency.

He seemed to despise both myself and my hospitality and he constantly looked down upon the most eminent officials of the town. On the other hand he is continually talking with the Poles.

On other political criminals and on charges. After a long conference he went out with them at night to the top of a hill which commands the town. There they held out of a case which they had brought with them an instrument in the shape of a long tube which seemed to me and my colleagues like a huge cannon. This they placed on a three-legged stand and aimed it straight at the town. Seeing the great danger which threatened the inhabitants of the town which is built entirely of wood I immediately ordered the town guard which consists of a sub-lieutenant and six men to march to the spot with loaded muskets

and not lose sight of this German's proceedings.

I send this to Your Excellency by a special messenger, and beg for a speedy decision once more assuring you of my submission and my devotion to the Czar and Holy Russia."

50 Years Ago

A half century ago China was noted for its pickled eggs, which were preserved with a pickle made of common mud, salt, salt-peter and soybean sauce all mixed together. The eggs were coated with a plaster of this mixture and laid away to cure. It was claimed the eggs kept for several months when prepared in this manner.

LANCASTER COUNTY CARPENTER MAKES QUILT

Uttas Adams of Warwick, Lancaster County, a carpenter by trade, completed a quilt in his own handwork in 1908. It contained 1146 patches, each measuring one inch square. Adams said he worked on the quilt at night over a period of about three years.

The will of the late James Oliver, inventor of the chilled plow and owner of the largest plow plant in the world fifty years ago had been filed for probate in the St. Joseph Circuit Court in Indiana.

Family ties were shown in the distribution of the vast fortune estimated at \$63,000,000, the bulk of which was left to Joseph D. Oliver, a son, to be administered by means of a trust fund.

LANCASTER FARMERS TAKE ACTION AGAINST HOBOS

Farmers in upper Rapho Twp., Lancaster County, made a move to clear the area of tramps back in March, 1908. The farmers claimed that women and young girls in many of the homes had been threatened and abused by the hobs.

In an effort to put an end to the nuisance farmers joined in the move, posting notices on their properties to the effect that tramps and beggars are not allowed on the premises and that

"All caught will be dealt with according to law."

An attempt to convert Brandywine Creek into a ditch, thus destroying the identity of "the old swimming hole" which James Whitcomb Riley made famous in one of his poems, had been defeated by a decision of the Supreme Court of Indianapolis.

The court held that the stream could not be converted into a ditch because the "necessity" for it had not been made apparent by the petitioners.

25 Years Ago

Mystified by the sudden death of a purebred Holstein bull while chained in its stall, Clyde Fellenbaum of near East Petersburg, did not discover the reason until he attempted to remove the ring from the animal's nose preparatory to removing the carcass.

When he touched the ring, Fellenbaum received a severe electric shock which knocked him down in the stall. An investigation disclosed that the chain attached to the ring was tied around an overhead girder, along which a conduit carrying 110 volts was fastened.

The links of the chain, rubbing constantly on the conduit, had worn through it until contact was made with the live wire electricuting the bull.

Returning from a party at which he had won a goose, Ernest Harner of Hanlin Twp., Mich., discovered that thieves had stolen all of his chickens.

A potato that had all the features of an airplane with the exception of a propeller was dug up on the farm of F. W. Shultz of Great Falls, Mont.

Jingle jangle went Mrs. Lee Krefauver's duck as it waddled around the farm near Boonsboro, Md., after swallowing a bell from the baby's rattle.

Laying six eggs a day, the Rev.

Bible Material: Matthew 28:18-20, Acts 13:1-3, Romans 1:14-8, Devotional Reading: Acts 8:26-35

World Wide Church

Lesson for March 23, 1958

THE Bible always means the same thing, but Christians' understanding of what it means changes from age to age. Sometimes the church ignores parts of the Bible and looks the other way, as it were, when their reading brings them to these passages. Sometimes the church may be very fond of a verse or an idea in the Bible, but their notion of what it means may be far off the beam. Sometimes the church in one era understands the Bible

Dr. Foreman

rightly—for that era; and Christians in a later time of the world will get another meaning, which is the right one for their era.

Go Into All the World

The Master definitely expected his religion to spread throughout the world. By all accounts his last orders to his friends were marching orders. Some church members seem to think—indeed, some of them will try to tell you—that each part of the world has its own special local religion and it is bad manners, if not worse, for us Christians to barge in so to speak into the territory already staked out for other gods. That, of course, is nonsense. If it were true, then the Pilgrim Fathers had no business bringing their Bibles to the New World. They should have come intending to join whatever religion the Indians might have.

Jesus would have thought it nonsense to expect the faith he founded to stay put in Jerusalem. There was no religious vacuum anywhere in the world then; there is none now. "Into all the world" meant, and still means, that the Christian gospel has to be taken right into competition with existing religions, some of them much older. "Into all the world" means that Christians go out with an arti-

cile which is already used everywhere; namely religion; but with a brand of religion the like of which, or the equal of which, has never yet been seen.

What Grandma Saw In It

There have been times, very long times in the history of the Christian church, when this last challenging command of Christ was completely forgotten. Christians had a vague idea that God would win worshippers all over the world but they had only the foggiest notions how he would do this, and besides, they figured it was God's business anyhow and they needn't bother. But along in the 19th century, the church began to have a different understanding of the Bible and of their responsibilities as Christians. Jesus' command to "Go, teach" in all the world was taken seriously, and what we know as World Missions or Foreign Missions was re-born.

The nineteenth century was a great Missions century. It saw the founding of the great missionary societies in Europe, Great Britain and America. It saw thousands of young people going out as foreign missionaries. Now in Grandma's time the way she, as a humble Christian looked at it was about the way the churches all looked at it. "We who belong to the Christian churches in the Christian countries are in duty bound to send missionaries to the dark and heathen lands of the world. We must send money too to build churches and open up hospitals and schools, we must keep on doing this we and our children, till the whole world has been converted."

A New Day Dawning

What happened? The missionaries succeeded better than Grandma expected. To make a long story short the Christian church was no longer as it had been for centuries a European-American affair. There was an Indian church and an African church and a south Pacific islands church and so on around the globe. What were these new churches to do? Sit still and live on missionary offerings from far-off America? Listen to sermons exclusively from missionaries, be "run" from New York or Edinburgh or Amsterdam? Not for long! The more Christianity succeeded the more certain it became that these "mission" churches would begin to stand on their own feet.

Max Smith

fore going out to pasture. The operation will cause less shock at the younger ages.

TO KEEP PLANT ROOTS MOIST — Within the next few weeks many young flower, vegetable and forestry plants will be set out. Due to weather conditions some of these may not be planted promptly after shipment. In these cases it is very essential to protect the young roots by heeling in or by keeping them moist in a cool dark place. The small roots must not be allowed to dry out if rapid rooting is expected.

TO USE SIMPLE SEED MIXTURES — If a new seeding of lawn or pasture or forage crop is to be made this spring it is advised that the mixture be kept simple using a few varieties of recommended varieties rather than a large assortment. In recent trials at the Penna. Experiment Station a simple mixture of one adapted legume and one adapted grass at recommended rates and with good fertilizer application outyielded a number of mixtures including a large number of grasses and legumes. Complicated seed mixtures increase both top and root competition for light, moisture, and plant food.

Broiler Ratio 4.6 This Week; Down 2 Points

PHILADELPHIA, March 17 (Federal-State Market News Service)—The broiler feed ratio this week was pegged at 4.6, down two points from the preceding week, but up four points from a year ago. The ratio is the number of pounds of feed a pound of live broiler will buy.

Here are the on-the-farm prices for broilers in the major commercial broiler areas:

DELMARVA Market steady. Offering heavy. Demand good. Larger sizes in upper part of price range. Prices paid at farm since Friday ended 10.30 a m. Broilers & Fryers 2½-3½ lb 21.20-23.30 (1,116,300 head—1%, 21.20-21½, 10%, 21½-22, 67%, 22-22½, 20%, 22½-23, 2%, 23-23.30. Intra-company bookings not included.)

Eastern Shore Poultry Grower Exchange March 14. Volume offered 1,037,400 head. Volume sold 986,800 head. Weighted average prices classified according to sizes estimated by inspectors: Under 3 lb 2½, 22.19, 3-3½ lb

25%, 22.09, 3¼-3½ lb, 48½, 22.24, and over 25%, 22.38.

NORTH GEORGIA Broilers & Fryers. Demand mostly fair. Supply fairly well balanced with present needs. Buyers offerings prices and estimated volume up to 11 a m today 2¼-3½ lb at farm 21¢ 675,800 head, FOB Plants 22¢, 362,400 head. Prices paid and reported volume for Friday and Saturday at farms 21-21½¢ (757,200 head - 90%, 21¢, 5% at 21½¢, 5% intra-company sales booked at 21¢), FOB Plants 22¢ (528,700 head - 80% at 22¢, 20% intra-company sales booked at 22¢).

NORTH CAROLINA Broilers & Fryers. Supplies adequate. Demand fair to good. Prices paid 24 hrs ended 10 a m today 2¼-3½ lb at farm 21¢ (487,000 head-80% 21¢, 20% undetermined).

SHENANDOAH VALLEY

Broiler & Fryers Offerings generally adequate for the fair to good demand. Heavy Hens scarce. Prices paid at farm since Friday ended 11 a m today, Broilers & Fryers 2½-3½ lbs 22-22¢ (192,200 head 54% 21¢, 13% 21¢, 7% 22¢, 26% undetermined). Heavy Hens 20-22¢.

TURKEYS Supply continues scarce. One lot smoky type Turkey Fryer 30¢. Weekly summary reported purchases Broilers & Fryers in Shenandoah Valley week ended 3/14/58 749,777 head 2¼-3½ lb ranged 21-22¢, wid avg 21.51. Change in reported purchased compared with previous week is minus 1.6%, compared with corresponding week in 1957 is plus 9.5%.

ARKANSAS Broilers & Fryers. Offerings adequate most points, short very few points. Prices paid & volume distribu-

Butchers Up At Chicago

CHICAGO, March 18 — Estimated Receipts: CATTLE 6,000, CALVES 200, HOGS 7,000, SHEEP 1,500.

tion at farm since Friday ended noon today 2¼-3½ lbs 614,908 head-42% undetermined, 19% 20¢, 27% 21¢, 1% 22¢, intra-company sales 6% booked at 20¢, 5% booked at 20¢ 5% booked at 21¢.

ALABAMA Broilers & Fryers. Offerings and supplies generally in balance with mostly fair demand. Sizes light and supplies short in few instances. Prices paid up to 10.30 a m today 2½-3½ lb at farm 21¢ (378,568 head 93% 21¢, 7% undetermined), FOB plants 22¢, (52,000 head all at 22¢).

telly 50 cents higher, most advance on weights over 1100 lbs, with such cattle mostly 50 cents up and extremes 1.00 higher on steers over 1200 lbs. Heifers steady to 50 cents higher, cows steady to 25 cents higher, bulls fully steady. Vealers steady to \$1.00 higher, stockers and feeders steady to strong. Load average prime 1350 lb Iowa fed steers 37.00, load high choice 1175 lb steers 34.25, other choice steers 28.00-33.00, mostly 28.50 up, good grade steers 25.50-27.75, utility and standard grades 21.00-25.00. Load near 1300 lb holstein steers standard with a utility end 24.00, good to average choice heifers 24.50-28.00, bulk choice grades 26.50-28.00. HOGS Active, uneven, fully 25 higher on barrows and gilts early, including most No 1 and 2 lots under 230 lbs later and closing trade on bulk barrows and gilts 25.50 higher, sows scarce, mostly 25 higher. All interests in trade and early clearance. Butchers over 260 lbs and No 1 lots all weights, as in scarce 190-230 barrows and gilts 21.50-21.75, 200-225 lbs 21.75-21.85, 125 No 1 22.00. SHEEP Slaughter lambs active, strong to 50 higher, sheep fairly active, fully steady. Load high choice 105 lb full woolled lambs 24.25, load choice 115 lb woolled lamb 23.25.

1958 FUL-O-PEP GROWING FEEDS

grow rugged, big-framed

PULLETS WITH A FUTURE!

Ful-O-Pep's Restricted Feeding Plan SAVES \$400 PER 1000 BIRDS

You buy only 2 lbs. Chick Starter — 5 lbs. Growing Mash per bird on range on the Ful-O-Pep Restricted Feeding Plan. You save up to 8 lbs. total feed per bird, over forced-feeding plans, or about 40¢ per bird!

Simplified plan makes feeding easy

You feed only 5 lbs. of Ful-O-Pep Growing Mash per 100 birds — 5 days a week. Feed oats every day. It's that simple! Ask your Ful-O-Pep Dealer how you, too, can grow big, profitable pullets... and save about 40¢ per bird!

The Quaker Oats Company... makers of dependable feeds for over 75 years.

BUILD HARD SOUND BODIES

Give your pullets the extra, body-building nutrients they need to grow *sound, sturdy* bodies and strong, rugged bones. Feed 'em new, nutritious Ful-O-Pep. It grows birds fit... not fat!

BIRDS LAY FEWER PEEWEES

On the famous Ful-O-Pep Plan, pullets are not forced to lay prematurely — are allowed to develop normally and fully before they are brought into egg production. As a result, they lay *big, full-sized eggs* — very few, if any, peweewees.

PRODUCE 18 MORE TOTAL EGGS

Research shows that pullets grown on the famous Ful-O-Pep Restricted Feeding Plan laid 18 more eggs than full-sisters grown on forced-feeding plans. Their eggs were bigger, too — averaging almost 1½ ounces more, per dozen!

PEAK PRODUCTION HIGHER

Yes, Ful-O-Pep grows big-bodied, fully-matured pullets capable of heavy, continuous laying and long laying life. Production peaks in tests were as much as 5% higher... total lay, higher too.

Conestoga Farmer Finds Strips Are Money Savers

The steeply rolling hills in Conestoga Township, southern Lancaster County, are covered with a loose soil that is especially prone to wash in heavy rains. Not only are gutters a fairly common sight, but more important, sheet erosion is gradually washing away land on the top of hills.

John C. Kendig used to see much of his good topsoil on the road after each rain. It bothered him. As a matter of fact, it bothered him doubly.

First of all, that topsoil was his, and when it was gone, it meant that his crop yields would

THIS IS THE farmstead of the John C. Kendig farm, R1 Conestoga. You can see some of the strips in the foreground and in the background. The pond is used for fire prevention and for recreation. The soil conserving strips were put on the farm in 1942.

go too. Secondly, it cost the highway department some \$40 or \$50 a rainfall to clean the mud and dirt from the road. This added to his tax bill.

That was in 1940, just after he had started to operate the family farm.

Now it's a different story. Of the 117 acres in the farm, 90 are in contour strips. An additional 22 acres are in permanent sod pasture and the remaining acres are in the farm homestead, lanes and a new pond.

The strips have been in some 16 years now. Kendig said that he was one of the first in the neighborhood to start using contour strips. From the way he talked, he is still one of the most

satisfied and proudest. The Kendig farm is operated largely as a dairy enterprise with 32 head of Guernsey cows in the milking barn. A few head of hogs are fattened and he keeps 400 layers.

The rotation followed then, is one to provide most of the feed and forage needed by the cows. A strip is kept in a legume mixture hay crop for two years, and is then followed by corn and a small grain. Then back to hay again.

Barley is being used as the small grain more and more. This summer Kendig expects to cut his corn acreage somewhat to make way for a sorghum-soybean mixture to be used as silage.

National Rice Week Commemorates 311 Years of Production in U.S.

This is national rice week. It commemorates 311 years of rice growing in these United States — rice was first grown here in 1647. Today, rice farming is an important industry in the United States. Good cooks depend on rice as a basic ingredient in many of their specialties.

Today the rice we eat is top quality American grown rice coming from Arkansas, Mississippi, Texas, Louisiana and California. This rice is used in thousands of different ways. It's eaten at breakfast as a cereal or hot bread; at lunch or supper as a soup, salad, main dish or dessert.

Rice is a favorite food all over these United States, although every section has its own favored way of serving it. Down Louisiana way, rice is put in about everything but coffee. Every creole dinner includes rice. Hot rice griddle

cakes and waffles, tender rice Batter Bread or Spoon Bread are favorites throughout the South.

Out in Iowa rice is an important part of Mulligan Stew. In sunny Arizona Chicken Fricassee with rice is a savory treat. Texans brag about a casserole of ground beef, rice, chili powder, tomatoes and green peppers and onions.

On the Pacific Coast a favorite is Pork Chop-Rice Casserole. Michigan boasts of creamed salmon served on a mound of hot tender white rice. The Pennsylvania Dutch like delicious rice stuffed cabbage rolls called Polish Pigeons. Wilted cabbage leaves are rolled around a savory mixture of ground beef, rice, onion and catsup.

In the New England States boiled rice is served with maple sugar or syrup and cream as dessert. South Carolinians serve fluffy, tender white rice with butter or gravy.

These are only a few of the ways rice is served all over these United States. More and more homemakers are learning that it is a true convenience food. They are discovering what a wonderful flavor extender rice is and how deliciously it stretches more expensive foods. Yes, this most im-

portant food in the world is be-

coming a most important food to the busy, nutrition conscious and economy-minded homemakers.

QUICK METHOD FOR COOKING FLUFFY, WHITE RICE To make six cups of white, fluffy perfectly cooked rice.

1. Put two cups uncooked white rice, four cups cold water and two teaspoons salt into a two-quart saucepan and bring to a vigorous boil.

2. Turn the heat as low as possible. Cover the saucepan with a lid. Do not remove lid or stir rice while it is cooking.

3. Leave saucepan over this low

heat for 14 minutes. Turn heat off. The rice is now ready to use. However, leave the cover on the saucepan to keep the rice warm if you are not ready to use it immediately.

For extra fluffy, tender, separate grains — allow the rice to steam for an additional 10 minutes — with heat off, but without removing lid.

The above will make slightly more cooked rice than is needed for some recipes. Keep the balance of the ready cooked rice in the refrigerator in a covered container. You'll find it mighty handy for adding to many quick, delicious and inexpensive soups, salads, casserole dishes, hot breads and desserts.

Something special for a main dish is this egg loaf. Mighty pretty to look at too, and oh, so good!

This loaf is so easy to make that you won't just save it for a party but will have it as a meann standby. Colorful to look at, this is a main dish which will entice

(Continued on page ten)

RICE, IN THIS part of the nation, is usually considered a desert to be eaten with cream and sugar. However it can sub-

stitute for potatoes or can be used in breads and in a variety of other combinations.

the most listless eater to help himself to second servings. The tasty sauce is just the right complement for this inexpensive and wonderful tasting egg loaf.

EASY EGG LOAF WITH QUICK CREOLE SAUCE

Ingredients for Loaf:

- 1 egg, beaten
- 4 cups hot cooked white rice
- ½ cup chopped whole canned pimiento
- ½ cup grated sharp cheese
- 1½ cups grated American cheese
- 4 hard-cooked eggs, coarsely diced
- ½ teaspoon salt
- ¼ teaspoon pepper
- 1 tablespoon butter or mar-

garine

Ingredients for Creole Sauce:

- ¼ cup butter or margarine (one-half stick)
- ½ cup chopped onion
- ½ cup chopped green pepper
- 2 tablespoons flour
- ½ cup water
- 1 #2 can tomatoes
- 1 teaspoon salt
- ½ teaspoon pepper

To prepare loaf: Mix together the beaten egg, rice, pimiento, cheese, hard cooked eggs, salt and pepper. Thoroughly grease a loaf pan (9¼" x 5¼" x 2¼"). Be careful to grease the bottom thoroughly. Cut up the one tablespoon of butter or margarine and distribute it over the bottom of the loaf pan. Pack the rice mixture into the loaf pan. Press in firmly. It is important that the

rice mixture be well packed into the loaf pan. Place in a preheated 350 degree oven and bake for 45 minutes. Remove from the oven. Cut around the edges to loosen the loaf from the sides of the pan. Place the serving platter over the loaf pan. Invert pan and platter together. Lift pan off the platter.

Method for preparing creole sauce: Melt the butter or margarine in a saucepan over a low heat. Add the onion and green pepper and cook, stirring occasionally, until the onion is tender. Place the flour in one corner of the saucepan. Gradually blend the butter or margarine into the flour. Cook, stirring, several minutes. Gradually add the water, stirring constantly. Gradually add the tomatoes. Add the salt and pepper. Cook until thickened. If the tomatoes do not have very much juice, add additional water to make the sauce the desired degree of thickness.

Serve the sauce over and around the loaf or in a separate dish. This recipe makes nine servings.

Egg fixed this way with gloriously browned bread crumbs, fluffy white rice, golden cheese and

tomato sauce are a certain success.

TOMATO SAUCE AND RICE

- 2 cups water
- 1 teaspoon salt
- 1 cup uncooked white rice
- 1 tablespoon grated onion
- ¼ cup water
- ¼ teaspoon Tabasco Sauce
- 1 cup grated American cheese
- 5 to 6 eggs, depending on servings desired
- ¼ teaspoon salt
- ½ teaspoon black pepper
- 1 8 ounce can tomato sauce
- ½ cup dry, not toasted, coarse bread crumbs
- 2 tablespoons butter or margarine

Cook rice as directed previously. Stir onion, water and Tabasco sauce into rice. Spread over a greased glass baking dish about 12 inches by eight inches by two inches. Sprinkle with half the cheese. Make depressions in the rice mixture. Break an egg into each depression. Sprinkle eggs with the salt and pepper. Pour on the tomato sauce. Sprinkle with the bread crumbs, then with the cheese. Cut up the butter or margarine over the top.

Bake in a pre-heated 425 degree oven 15 to 18 minutes for soft eggs and about 20 minutes for firm eggs. Serve immediately. This recipe makes five to six servings.

For Farm Women...

(Continued from page ten)

All through the South rice Spoon Bread or Batter Bread is a favorite. If you've never eaten it you're in for a real treat. It's puffy and brown on top like a souffle. It is perfect as a bread for any meal and makes a main dish served with bacon or sausage. Eat it with butter and many people like hot maple or brown sugar syrup over it.

CAROLINA BATTER BREAD (SPOON BREAD)

¾ cup uncooked white rice
1½ cups water
1½ teaspoons salt
2½ cups milk
½ cup yellow or white corn meal
3 tablespoons butter or margarine

3 eggs separated.
Cook rice. Stir the milk and corn meal into the rice. Cook over a medium heat, stirring until the milk is absorbed and the mixture thickens. Add the butter or margarine. Cool slightly. Beat the egg yolks. Stir the egg yolks into the rice mixture. Beat the egg whites until stiff but not dry. Fold into the rice mixture. Place in a greased two-quart baking dish. Bake in a pre-heated 400 degree oven about 40 minutes or until a knife inserted in the center comes out clean. The top will be very brown. Lower heat if top becomes too brown before mixture is done in the center. Serve immediately with butter or margarine. Hot maple or brown sugar syrup is delicious, too. This recipe makes eight servings.

A different way to serve shrimp

EMERALD RING WITH CURRIED SHRIMP

2 cups water

1 teaspoon salt
1 cup uncooked white rice
1 cup finely chopped cooked spinach, drained (10-ounce package, frozen)
2 tablespoons grated onion
¾ teaspoon black pepper
¼ teaspoon chili powder
¼ cup butter or margarine (one-half stick)

Cook rice. Salt spinach to taste. Stir in rice, onions, black pepper, chili powder and butter or margarine. Press into a well greased ring mold. Use as large a mold as possible. Serve immediately or make ahead of time and about 40 minutes before serving, place mold in a skillet of hot water. Heat until hot through. If desired, spoon rice-spinach mixture into a ring on serving plate instead of molding.

SAUCE

About 1½ teaspoons curry powder
About ¾ cup water
2 cans (10½ oz.) condensed cream of celery soup

Farm Women 8 Plan Consistent Charity Program

Society of Farm Women 8 met March 15 at the home of Mrs. R.

About 14 oz. shelled, deveined shrimp, raw or cooked.
To make shrimp sauce, mix curry powder, water and soup in a saucepan. Add shrimp. Heat 20 minutes or until shrimp turns pink or is very hot. Taste. Add more curry powder if desired. Add water for a thinner sauce.
To serve, unmold the rice-spinach ring on a large platter. Fill center and surround outside with shrimp mixture. A small bowl may be placed in center of ring to hold sauce if sauce is very thin. This recipe makes six servings.

11 Forney Elizabethtown. Serving as co-hostesses were Mrs. Henry Musser, Mrs. William Long and Miss L. Mae Brinser.

A report of the finance committee was heard, after which the group voted to give consistently through the year to the various charitable organizations in the county.

Mrs. William Powers of Elizabethtown presented a talk on "Women of the Bible" using appropriately dressed dolls to depict such characters as Mary, Queen Esther, Rebecca and others.

A St. Patrick's Day theme was used in group singing and in the decorations.

A Sunshine Box was filled for Mrs. Benjamin Keener, a member who is ill at her home on Barnbridge Road.

The next meeting will be held April 19 at the Landisville Fire Hall with Mrs. J. Clarence Reet serving as hostess.

Healthy Chicks Make Great Layers!

Are You Going To Buy STARTED PULLETS?

A lot of poultrymen are asking themselves this question.

Will they cost me more? Will they cost me less? Will they help me make more money? It's difficult to give one answer—but here are a few pros and cons on Started Pullets.

ADVANTAGES

- 1—Ready-to-lay pullets when you need them to keep your houses full of layers.
- 2—No need for special houses and equipment for young stock.
- 3—Eliminates extra time and care needed during brooding.

DISADVANTAGES

- 1—Possibility of bringing outside diseases to the farm.
- 2—May be more expensive than raising own young stock.

More and more people are buying Started Pullets. Many of them are choosing Babcock Bessies. They know Bessies produce greater profits.

THE QUALITY STARTER
ASSURES MAXIMUM
UNIFORM GROWTH!

Master Mix Chick Starter is the quality starter that builds more healthy, hearty chicks than ever. Also contains medicants to help protect chicks against coccidiosis.

Eli M. Wolgemuth

Ph. Landisville TW 8-3031

Manheim R. D. 1

A. H. HOFFMAN SEEDS, INC., Landisville, Pa.

AGRONOMISTS HAVE FOUND that modern fertilizers not only help the crop, but also help build up soil fertility in general. Whereas farmers used to apply all the fer-

tilizer as the crop was planted, they now plow down the bulk of the bulk of the nutrients and apply only starter in the row

Chemical Fertilizers Help Build Organic Matter by Feeding Bacteria

From the cotton fields of the South to the corn fields and pastures of the northern states has come one of the most revolutionary fertilizers in recent years.

Anhydrous ammonia was developed by research workers in Mississippi during World War II. The revolutionary part of the fertilizer is that it is applied as a gas rather than as a solid or liquid.

Anhydrous ammonia is a mixture or compound of nitrogen and hydrogen. It is formed by combining atmospheric nitrogen and hydrogen from natural gas under heat and pressure.

In most fertilizer manufacturing processes this ammonia is combined with another element or compound to make a solid. This of course adds to the cost of materials and therein lies one of the most favorable aspects of anhydrous. It costs less per pound of nitrogen.

Ammonium nitrate, for example, is about 32 per cent nitrogen. Anhydrous ammonia contains more than 80 per cent nitrogen.

In the cropping systems used in Pennsylvania, barnyard manure is used to a great extent as the nitrogen source. This manure also goes to build humus or organic

matter. There are many misconceptions about organic matter.

Dr. Firman Bear, USDA soil scientist, says, 'Plants are the producers of organic matter, not the users of it. They feed primarily on the inorganic matter that is released by the soil and the decay of organic matter and not the organic matter itself.'

He adds that one of the best ways of increasing the supply of organic matter is by the use of chemical fertilizer.

When large amounts of strawy manure are added to a field, often the first years crop production will be lowered. The bacteria which break down the straw and other woody substances feed on nitrogen. These bacteria will get the available nitrogen from the soil before the plant.

But if added nitrogen is applied there will be enough nitrogen in the soil to feed the bacteria and still leave enough for maximum plant growth.

During the seven months ending Jan. 31, exports of bread and coarse grain from Argentina totaled 2,598,000 tons compared with 2,389,000 tons in the same period a year earlier.

Lower exports of corn and wheat accounted for most of the reduction.

C. B. Hooper to Receive Citation From Brand Names Foundation

NEW YORK, N. Y. — C. B. Hooper, Intercourse, Pa., will receive a special citation "for consistent presentation and distribution of manufacturers-trademarked products, and for accomplishment in interpreting to the public the consumer benefits of the brand competitive system."

The citation was awarded by the judging panel of the Tenth Annual Brand Name Retailer-of-the-year competition to the "Finalists" submitting comprehensive display books of their 1957 brand promotional activities.

The citations were announced today by Henry E. Abt, president of the Brand Names Foundation, sponsor of the competition,

which each year draws thousands of entries from merchants competing for this retailing "Oscar." This year's competition, included merchants from 48 states, the District of Columbia, Alaska, Puerto Rico, Hawaii, and Canada. "Finalists" were selected in January from these entries.

25 Million Pounds Of Poultry Canned

In January of this year a total of 25,031,000 pounds of poultry, ready to cook weight, were used in canning and other processed foods.

This compares with 17,143,000 pounds so used in January 1957, an increase of 46 per cent.

They Look Alike But How Will They Produce?

Newly hatched chicks may look alike, but there may be a tremendous difference between them. That's why it is wise to start right with GASSON G-33, four-way hot cross leg-horns, scientifically bred for excellent livability and production.

LARGE WHITE EGGS, NO TINTS, NO BLOWOUTS, NO BLOODSPOTS, NO LEUCOSIS, GOOD SHELL TEXTURE. Increase your net egg profits by ordering your GASSON G-33 Now. **WE ALSO HAVE KIMBER MT. HOPE STRAIN CROSS, AMES-IN-CROSS HYBREDS, SEXLINK and R. I. REDS, N. H. CROSS.**

Guernsey Calf Sale for Youth To Be April 2

The first junior Guernsey Calf sale will be conducted exclusively for the benefit of 4-H and FFA members at the livestock pavilion on the Pennsylvania State University campus, April 2.

Bidding on the 58 outstanding show prospects will be restricted to 4-H or FFA members who may buy one or more calves each. Calves will be grouped according to ages and quality and an average figure per calf will be determined by a committee before the bidding starts.

Included in the sale will be 16 junior yearlings, 39 senior calves and three junior calves.

The sale is being sponsored by the Pa. Guernsey Breeders' Assn. primarily to make available better Guernseys for project work. It will be operated on a non-commission basis.

All calves are from Bangs accredited and T. B. certified herds and will have individual health charts. Each calf will be insured for \$100 for one month starting April 1, 1958.

The sale, which is set to start at 12:30 p. m., will be managed by William H. Juzi, business manager of the Guernsey Breeders' Assn. Walter Dupes, of Elizabethtown, will be auctioneer.

Youth committee members include Robert C. Neff, Alexandria, chairman; Ellis Anders, Landale; C. Eugene Harding, Brookville, and Eugene Hege, Fayetteville.

Members of the dairy science extension staff of the University will assist.

QUARRYVILLE, PA.

16—Lancaster Farming, Friday, March 21, 1958
**Soil District President Predicts
 1958 to Be "Biggest Year Ever"**

**11 New Members
 Admitted to
 County SCD**

Eleven new cooperators were accepted by the Lancaster County Soil Conservation District at a meeting of the directors held Monday night following the annual meeting.

The cooperators are Lloyd M. Zimmerman, R1 East Earl, 108 acres, Tad E Shaw, Elizabethtown, 50 acres, James E Supplee, R1 Ronks, 40 acres, Robert Counts, R1 Nottingham, 127 acres, John R Heri, R1 Willow Street 132 acres.

Harry O Sheets, Peach Bottom, 49 acres, E Benjamin Shank, R2 Holtwood 165 acres, Clayton Kreider, Fairfield, 162 acres, Frank S Heir, R1 Washington Boro, 108 acres, Lloyd Kreider, R2 Quarryville, 118 acres, and Clarence Keener Sr., R3 Manheim 105 acres.

The directors authorized the sign committee to work with the Berks County district in the election of signs marking the boundaries of the two soil districts.

(Continued from page 1)

Farmer Award was presented to Andrew Hackman, Manheim, and a plaque was presented to Robert Fahnestock, Manheim, as the champion FFA land judge in the Lancaster-York County area.

Eight special awards were presented. They went to Dean Hofer, for outstanding conservation work, Joseph McGahan, outstanding work by the Manheim FFA Chapter, Manheim FFA Chapter, outstanding conservation work; the Rev Cleo Leitzel, Muddy Creek Church, Soil Stewardship participation; John Melhorn, outstanding watershed meeting, Roy Pribaker, Farm Equipment dealers Assn., Russel Drumm, Cocalico Union High School, and Don Brandt, Lancaster Newspapers, Inc.

Also on the program were Dean Hofer who gave his speech "Our Heritage," the Rev Cleo Leitzel, who gave the invocation, and Dr. Gilbert McKlveen, Lebanon Valley College, who gave a humorous lecture.

Other business concerned the paying national and state dues and other financial business.

WINTER BARLEY is checked for heaving and general condition by John C. Kendig. The winter seemed to affect the crop little, with very few plants heaved out of the

ground. A winter cereal crop is part of the four-year rotation he practices on his 90 acres of strip-cropped farmland. (LF Photo)

 Vertagreen... comes in a variety of analyses!

ARMOUR FERTILIZER WORKS

GlyCamide

**New, Safer, More Active Coccidiostat
 now available in**

Red Rose® FEEDS

**ASSURES HIGH POTENCY, SAFE PROTECTION
 AGAINST COCCIDIOSIS FOR CHICKS OF ALL AGES!**

Now... Glycamide, the new Merck coccidiostat — with all the assets of Nicarbazine — can be fed with safety to broilers and replacement chicks for laying and breeding flocks. GLYCAMIDE CAN BE SAFELY FED — WITH NO SIDE EFFECTS — TO PREVENT COCCIDIOSIS OUTBREAKS IN BIRDS OF ALL AGES! When used at recommended levels. GlyCamide will not interfere with subsequent fertility, hatchability, eggshell pigmentation or internal egg quality.

GlyCamide is recommended only for the prevention of coccidiosis in chickens. It is not recommended for controlling outbreaks of coccidiosis or the prevention of coccidiosis in turkeys (Sulfaquinoxaline is still recommended for this treatment).

GlyCamide is available in these Red Rose starting and growing feeds!

**Red Rose Chick Starter
 Red Rose Starter & Grower
 Red Rose Growing Mash
 Red Rose Complete Growing Ration
 Red Rose Broiler Starter Ration
 Red Rose Broiler Finisher
 Red Rose 42% Starter-Broiler Supplement**

SEE YOUR LOCAL RED ROSE FEED DEALER and let him explain the benefits of GlyCamide to you, and show you how Red Rose Feeds containing GlyCamide offer complete coccidiosis protection for your flocks.
